EDUCATION

Monash University Malaysia **February 2024 - Oct 2026 (Expected)**
Bachelor of Computer Science (Advanced Computer Science)

- CGPA – 3.620
- Weighted Average Mark (WAM) – 77.903

EXPERIENCE

Ant International **November 2025 - February 2026**
Engineer Intern

- Contributed to AI-enabled business channel integration across Alipay+, Antom, WorldFirst, and Bettr, supporting automated configuration, testing, troubleshooting, and release processes.
- Developed backend workflows to automate business integration and test execution, translating integration requirements into structured technical solutions.
- Developed an LLM-powered solution using Java and SOFA AI to streamline release planning and improve communication of system changes to stakeholders.
- Conducted end-to-end API testing using Postman, investigating integration issues and validating frontend–backend workflows and AI outputs.
- Prepared technical documentation covering solution design, system architecture, implementation workflows, and deployment processes.
- Built and maintained a Python chatbot for automated regression-test reporting, using SQL to retrieve test data and Docker for deployment through an internal messaging platform.

PROJECTS

Agentic AI for Finance Operations Automation (FYP) - Ongoing **2026**

- Developed an AI-powered invoice processing workflow using IBM watsonx Orchestrate, MCP, and Python to automate document processing and validation for finance operations.
- Developed custom validation tools to check extracted information against required fields, values, and business rules.

NUTRITACK - https://github.com/jhuigjh/NutriTrack **2025**

- Developed a nutritional tracking Android application using Kotlin and Jetpack Compose, applying user-focused design and structured data management.

SKILLS

Programming: Python, Java, JavaScript/TypeScript, SQL, Kotlin

AI & Technology: AI Agents, LLMs, Agentic AI, MCP, AI Workflow Automation, AI Solutions, Digital Transformation, Payment Technology, REST APIs

Frameworks & Tools: SOFA AI, IBM watsonx Orchestrate, Spring Boot, Postman, Docker, Git, MongoDB, Oracle Database, Tableau, Figma

Other: Prompt Engineering, Software Testing, OOP, Data Structures & Algorithms, UML, MVVM Architecture, Jetpack Compose, Room Database, Android Studio

Languages: English (Native), Mandarin (Native), Malay (Native)
